

# **FLORIAN POSER**

## **Solo Vibraphon**

Creating a solo performance always is a big challenge for an instrumentalist. Since the seventies also jazz musicians increasingly live up to this task. While the most established instrument for this kind of genre is the piano, solo performances on other instruments are rather rare. So the solo performance of the vibraphonist Florian Poser is a markedly exclusive rarity.

The first outline of Florian Poser's solo performance was formed and developed many years ago and it develops continuously until today. The performance presents the experience and diversity of his musical creativity and shows Florian Poser's enormous skills on the vibraphone.

A concert with Florian Poser is similar to an exciting journey through different musical worlds: Jazz standards played with four mallets, pieces in the style of Brazilian jazz, newly arranged songs by the Beatles, improvised sound impressions and subtle sheets of sounds. An evening with Florian Poser playing solo vibraphone brings something new and something traditional - sophisticated entertainment for everybody.

In short: A musical event for curious listeners with open ears and hearts.
